

# TOP FIVE STRATEGIES FOR SUCCESS

## Family Engagement Site Contact

### Attend Monthly Trainings

Site contacts will receive information and resources to support their work in the school. Additionally, they will have opportunity to network with site contacts in their feeder patterns and throughout the district.

### Complete and Submit Assignments

Monthly assignments are designed to make Family Engagement strategies impactful and uniquely relevant to each school.

### Facilitate the FE Team

The Family Engagement Team is the number one resource in creating a school culture that honors and involves families and community. It is imperative that the members of the team are dedicated to the work and believe in the benefits of parent involvement.

### Share the work

To create meaningful and lasting relationships with families, one individual cannot “own” the planning or the work. A team approach will help organize your efforts and create a cohesive plan that involves all stakeholders.

### Spread the word

In order to build capacity, Site Contacts should share the information and gather feedback from staff.
